

# Asphalt meltpacks in place of 100 lb kegs for roofing

## Description

Use 50 pounds meltpack “bricks” instead of the standard 100 pounds kegs, reducing heavy lifting. Keg wrappers are melted in the kettle along with the asphalt.

Ergonomics @ work

*Meltpacks can be lifted with one person more easily. This type of packing may also reduce the risk of axe and eye injuries, from breaking up asphalt kegs.*
